ABOUT US

Polyzen Packaging was founded in 2025 by Naciye Akin, as a result of long years of knowledge and industry experience.

With an eco-friendly approach and awareness, we produce innovative, aesthetic, and sustainable packaging solutions in the field of disposable food and beverage packaging.

We believe that packaging is not merely a means of protection, but a way for brands to express their identity and values.

With this understanding, we prioritize quality, hygiene, and respect for nature at every stage — from design to production.

Our brand name, “Polyzen”, is derived from the combination of poly (science and technology) and zen (balance and simplicity).

This philosophy represents the core of our production mindset, bringing together technology, innovation, and natural harmony.

At Polyzen Packaging, we transform brand stories into packaging — creating eco-friendly, hygienic, and visually refined solutions.

Because we believe that every package carries a brand’s story.

WHO WE ARE

At Polyzen Packaging, we provide tailor-made paper cups, PET cups, crystal dessert bowls, and takeaway packaging solutions for businesses.

At the core of our operations lie the principles of quality, environmental awareness, and sustainable production.

In our production processes, we use recyclable raw materials and strictly adhere to waste management and energy efficiency policies.

For us, every package reflects your brand's value and its responsibility toward nature.

WHY POLYZEN?

Sustainable production: Environmentally conscious manufacturing with recyclable materials

High quality: A perfect balance of hygiene, aesthetics, and durability

Design-driven solutions: Modern, functional, and customized packaging options

Reliable partnership: On-time delivery, flexible production capacity, and solution-oriented service

Polyzen offers not just products, but a culture of innovation and conscious, nature-friendly production.

We exist to make the packaging world of tomorrow greener, more refined, and truly sustainable.
